Dear Dave and Jeryl,

Attached is a revised drill plan for SPS's Stage 2 drilling at the Bear Deposit in Yerington. We have slightly modified the technical details of the Rotosonic drilling procedures in the alluvium, which are discussed in Section 5 (Environmental Considerations) and Section 8 (Rotosonic Drill Procedures). In summary, the Rotosonic drilling procedures have been adjusted so as to maintain a 4 inch annulus between the Rotosonic borehole and the casing. There have been no changes to the number or locations of the proposed drill holes. We still anticipate starting the drill program in August.

Please let us know if you have any questions.

Regards,

Taurus

Hi Taurus,

That is great news!

We also saw the press release!

Thanks, and congratulations to all!!!!!!

Jeryl

Dear Dave and Jeryl,

This morning, Quatterra/SPS announced that we are advancing to Stage 2 of the option agreement with Freeport Nevada. As discussed with both EPA and NDEP earlier this year, this Stage will involve drilling at the Bear Deposit.

Please find the attached drill program for Stage 2. We anticipate starting the drill program by mid-July or early August.

Please let me know if you have any questions.

Best Regards,
Taurus
